

Datasheet

ReportMiner

sales@astera.com | 888-77-ASTERA

Introduction

ReportMiner enables businesses to quickly and easily extract data from printed documents and integrate it into their database so it can be leveraged for operations and business intelligence needs. Once ReportMiner has extracted the data, it can be leveraged using Astera's Centerprise Data Integrator for many different applications, including data integration, data transformation, data quality, and data profiling.

Key Features

- Extract data from PDF, PRN, Excel, CSV, XML, and text files
- Support for data quality checks and validations
- Support for integrating extracted data to downstream applications and databases
- Easy-to-build models that can be used over and over
- Drag-and-drop interface with single-click preview

ReportMiner Benefits

Complete Data Integration

Leverage extracted data using Astera's Centerprise Data Integrator for a number of complex, hierarchical data integration and management processes.

Test and Verification

The single-click preview capability shows extracted data and any conversion or validation errors, enabling users to verify and test report models as they are being built.

Easy to Use

Drag-and-drop, code-free environment enables business users to accomplish a wide range of data extraction tasks without IT support.

Reusability

Visually define a report model and save it to use over and over again.

Hierarchical Model Capability

Extract data from complex hierarchical reports in a single pass using ReportMiner's hierarchical model capability.

High Performance

High-performance parallel-processing engine efficiently processes large data volumes.
